
 Samen Kantershof – Strong together, sustainable together!

Making your home sustainable pays off – now and later

Energy costs keep rising. An energy-efficient home keeps your energy bill lower. It also makes your home more comfortable: with better insulation, fewer draughts and less cold in winter and cooler in summer. Sustainability also counts more and more towards the value of your home, and you will be better prepared for a future with less or no natural gas.

Lots of news on energie.kantershof.nl

There is a lot of news on energie.kantershof.nl, both for those who want to make their home more sustainable and for those who want to make it more energy-efficient. New articles are added regularly. Existing articles are sometimes rewritten to make them more up to date and complete.

Building Archive 1974 now online

A long-cherished wish has come true: the 1974 Building Archive is now online. Residents, and contractors too, regularly ask for information about how the houses were built.

That information can now be viewed and downloaded by everyone. The documents, including drawings, permits and calculations, come from the Amsterdam City Archives (Stadsarchief Amsterdam).

Menu, Help Table and Checklist – look before you leap

The Sustainability Menu, the Help Table and the Checklist help you make choices. They also help you ask the right questions when talking to advisors. Everyone's situation is different, so what works well for one household may not suit another. 'Look before you leap' certainly applies to choices for your home.

Insulating your roof? Watch out for the channel plates!

On the concrete roof deck of the homes in Kantershof lie wood-cement channel plates (kanaalplaten) with ribs on the underside. The resulting air layer makes insulation much less effective. During roof renovation the channel plates should therefore be removed first. Many roofers are not familiar with this roof type and simply lay new insulation on top. So discuss this with your roofer in advance.

Coming soon on the site

These articles are in preparation:

- Insulating the roof from the inside: is it possible?
- Heat emitters and the boiler's water temperature: why does it matter?
- Electricity connection: what do you need when switching to induction cooking or electric heating?
- A home battery: will it pay for itself?

Help your neighbors! – share your experience

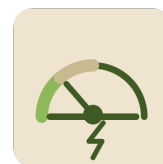

Everyone in Kantershof is looking for a good company for work on their home, but where do you find one? **Help your neighbors** with your experience. Did you hire a contractor, handyman or handywoman, installer, glazier, roofer, gardener, locksmith, maintenance worker, cleaner, etc., or did you do the work yourself? All experiences in and around the home are welcome. What went well, and how were problems solved? Your experience is really important and valuable to others!

→ Share your experience at energie.kantershof.nl/reviews (menu Reviews)

Free energy coach – especially useful now

Energy prices are rising, so it is all the more worthwhile to have someone take a look with you. You can request a free energy coach through Stichting Woon. The coach helps you understand your energy use and shows you how to lower your costs. You learn from it, get useful tips and receive free materials.

→ Request the energy coach via wooninfo.nl/vraagbaak/energie/energiecoach
